Introduction

Swiss methodology of practical courses will be applied. Practical exercises means, that 1 Teacher and 4 participants are intensive working on one ultrasound machine. In one hour of practical exercises, the group of four see two different patients. It will be seen many patients with very different pathologies, the lectures in course are concentrated on Doppler and CEUS (contrast enhanced ultrasound), but in practical part also refreshing all abdominal sonopathology and all types of ultrasound examination will be presented. As official Euroson school, it is accepted as continuous medical education in many European countries.

Organisation KUS (Košice Ultrasound School).
